Acadia

Dr. Öğr. İlker Yoncacı

PROJECT ADVISOR

PROBLEM DEFINITION

University students struggle with:

- Academic overload
- Poor task organization
- Burnout and stress
- Inconsistent study habits
- Lack of intelligent academic planning

Existing productivity tools do not combine:

- Academic analytics
- Stress monitoring
- Ai recommendations
- Academic risk detection

PROJECT OBJECTIVES

Acadia aims to:

- Improve academic organization
- Track study performance
- Monitor stress and burnout
- Provide ai-assisted study recommendations
- Calculate academic risk levels
- Help students build consistent study habits

SOLUTION

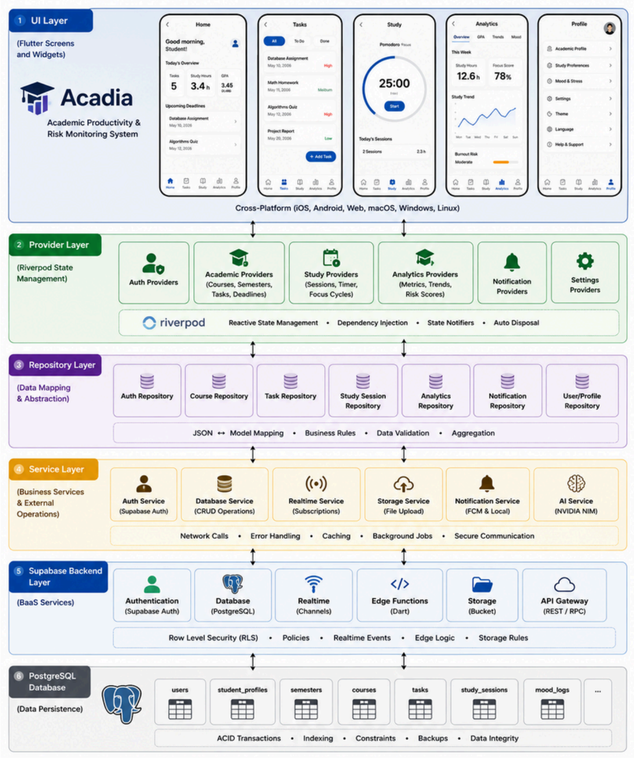

Acadia is a cross-platform Flutter application that combines academic management, analytics, stress monitoring, AI assistance, and intelligent recommendation systems into one integrated platform.

Supports:

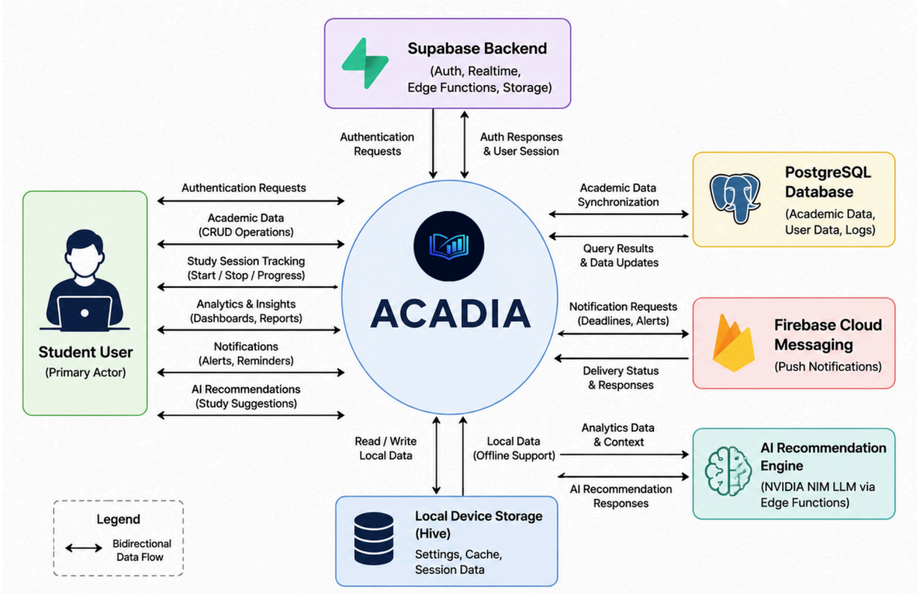

- iOS
- Android
- Web
- Desktop
